Rationale for the Basis of Jurisdictional Determination (applies to any boxes checked above). If the jurisdictional water or wetland is not itself a navigable water of the United States, describe connection(s) to the downstream navigable waters. If B(1) or B(3) is used as the Basis of Jurisdiction, document navigability and/or interstate commerce connection (i.e., discuss site conditions, including why the waterbody is navigable and/or how the destruction of the waterbody could affect interstate or foreign commerce). If B(2, 4, 5 or 6) is used

[] (ii) from which fish or shellfish are or could be taken and sold in interstate or foreign commerce.
[] (iii) which are or could be used for industrial purposes by industries in interstate commerce.

[](7) The presence of wetlands adjacent? to other waters of the US, except for those wetlands adjacent to other wetlands.

[x] (4) Impoundments of waters otherwise defined as waters of the US. [] (5) The presence of a tributary to a water identified in (1) - (4) above.

[] (6) The presence of territorial seas.

as the Basis of Jurisdiction, document the rationale used to make the determination. If B(7) is used as the Basis of Jurisdiction, document the rationale used to make adjacency determination:

Other information (please specify):		

Wetlands are identified and delineated using the methods and criteria established in the Corps Wetland Delineation Manual (87 Manual) (i.e., occurrence of hydrophytic vegetation, hydric soils and wetland hydrology).

²The term "adjacent" means bordering, contiguous, or neighboring. Wetlands separated from other waters of the U.S. by man-made dikes or barriers, natural river berms, beach dunes, and the like are also adjacent.
